

How To Customize Your Bookmark File

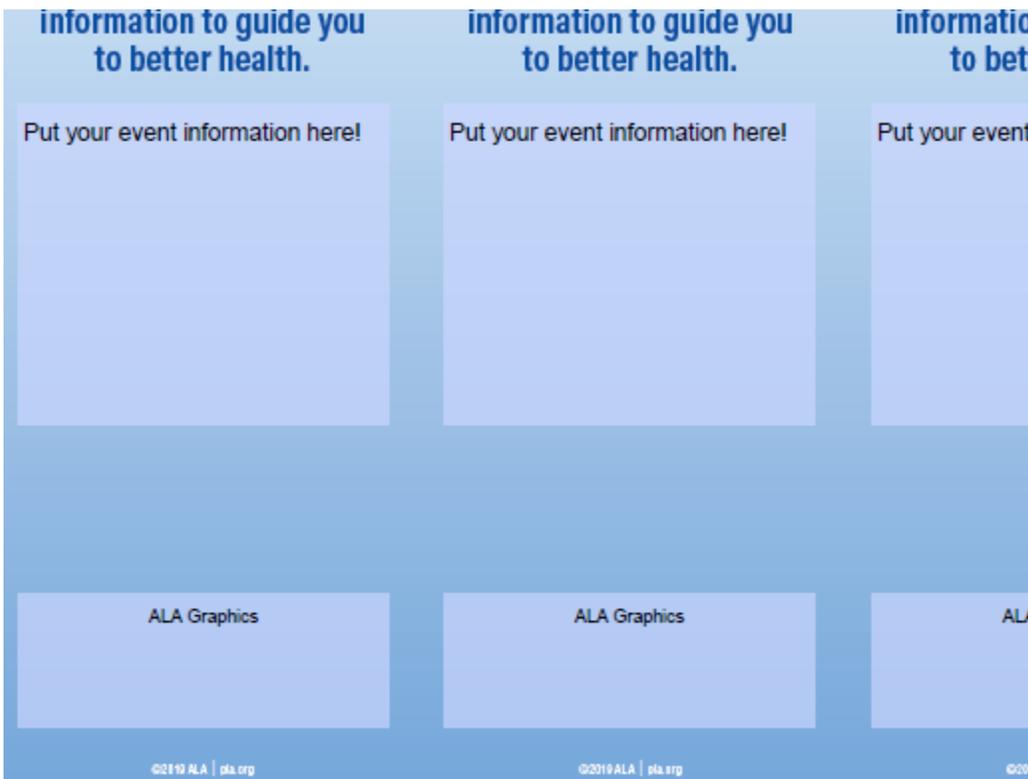

The PDF shows five bookmarks with three fields for customization: two text boxes and one image box.

Font used in main text is **Arial**.

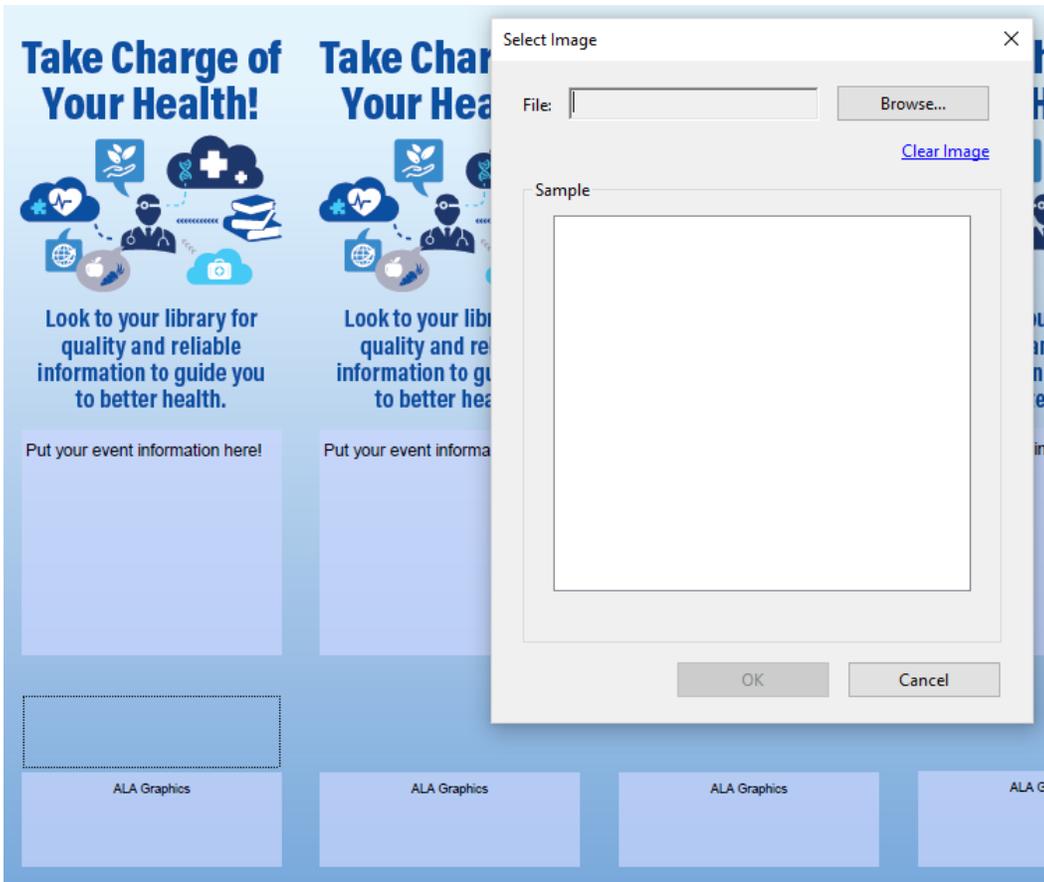

Shaded areas indicate fillable text boxes (shaded color will not print). Hover mouse over the space between the text boxes and left-click to insert a logo in this space.

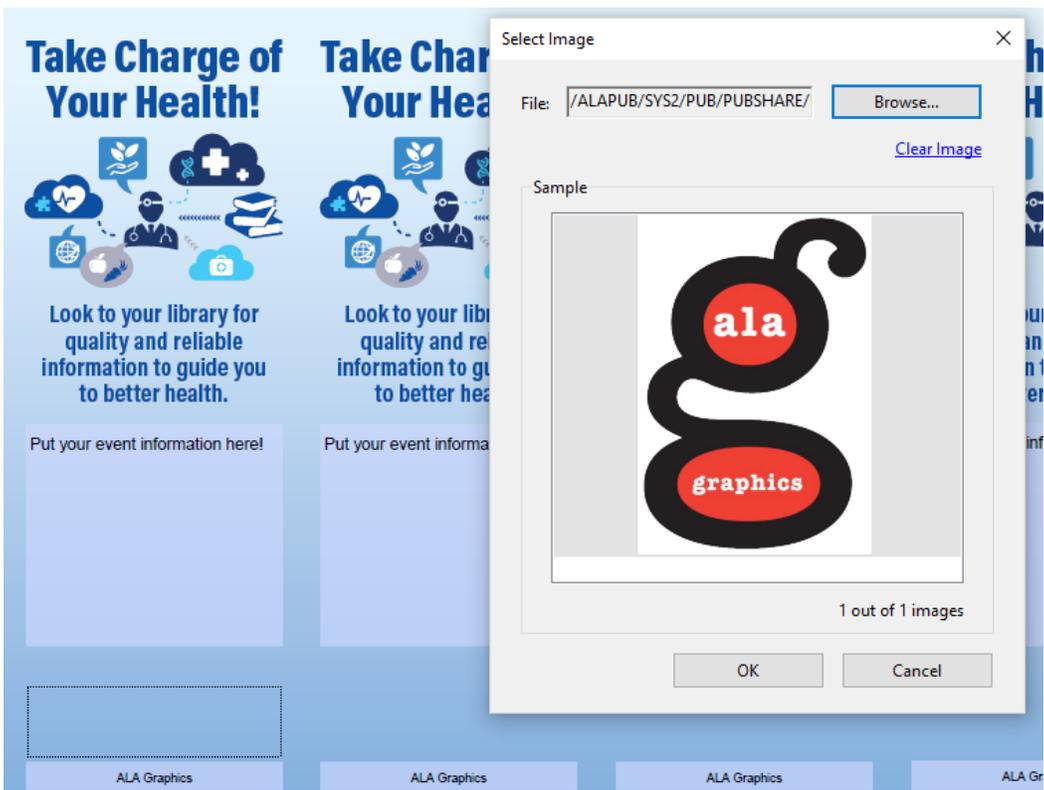

Add information on your library's health literacy events in the two shaded text boxes. The shaded color will not print. Typing in one box will auto-populate the same box for the other four bookmarks.

To add your logo, left click the box in between the two text boxes. A box will prompt you to select an image.

Once you've selected your image, click OK.

The image will also auto-populate. Now you have five bookmarks ready to print!
